1. The abstract of the disclosure is objected to because legal phraseology are used in this paragraph (i.e., "comprises"). Correction is required. See MPEP § 608.01(b).

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 7,302,456. Although the conflicting claims are not identical, they are not patentably distinct from each other because: (1) the "mixer" of the U.S. Patent No. 7,302,456 recites "fluctuation superposed signal with analog ...superposed on an input signal represented by an analog". It implies adding two signals (see Fig. 14); and (2) the "difference calculation means" of the instance application recites "output fluctuation difference data with an output fluctuation generator added to a difference in analog between two data". It also implies adding two signals, wherein one is different between two data". If the "input signal" of the U.S. Patent No. 7,302,456 is the "different between two data", the claims seem to be nearly identical.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.
